\$19.95
PER DAY

DID YOU KNOW?
Only a thin layer of ice separates a truckload of
supplies from starvation as it travels across the Canadian
north. How do you survive? It's all about the ice road!

Most of the main computer guidance is tightly clustered east of the ArkLaTex raising confidence that the worst part of the storm pass us by.

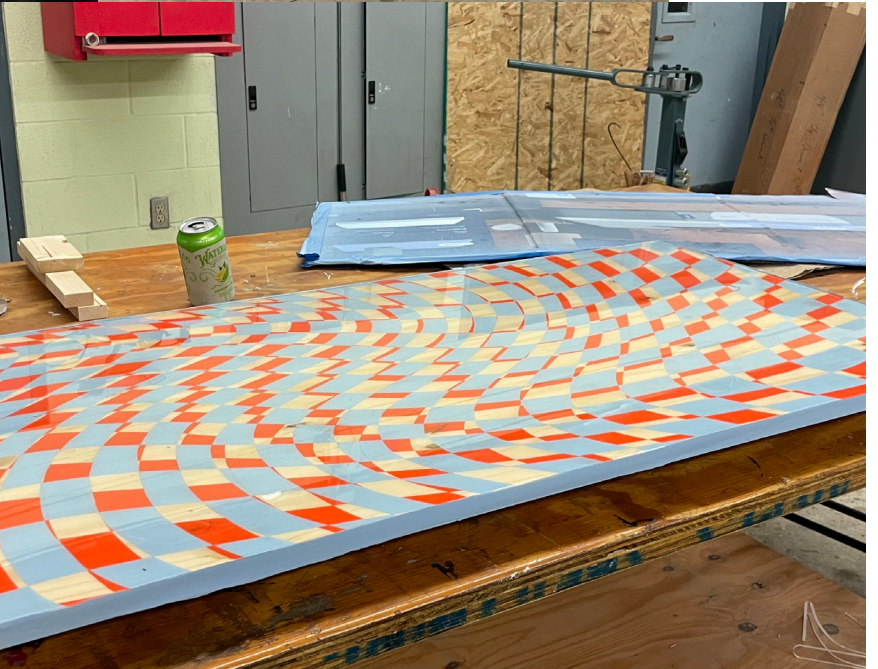

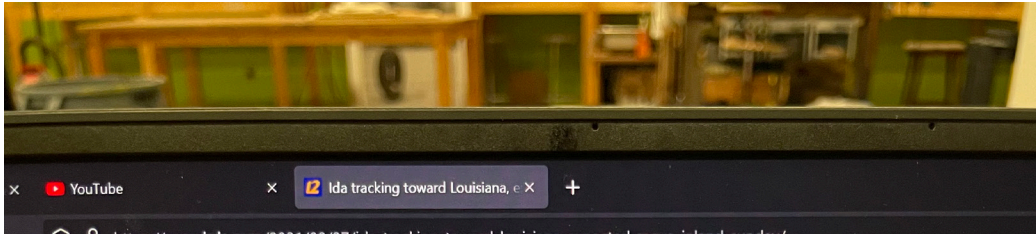

Computer model forecasts of where Ida will track (Source: KSLA)

Based on that projection wind gusts are likely to only be near or a little below tropical storm force, primarily from Natchitoches to Ruston.
